PACE P5611
MULTIBAND MONITOR ANTENNA
30-512 MHz

The PACE P5611 is a broadband antenna and provides satisfactory reception in the 30-512 MHz range. It is primarily designed for use with scanning monitors such as the PACE SCAN 308.

INSTALLATION

1. Select an appropriate antenna location and route the cable from the set to the antenna. (Cable not supplied.)

2. Loosen mounting nut (5) and assemble radials (7) to hub as shown in the illustration. Retighten mounting nut.

3. Connect cable to the antenna (accepts PL-259 plug, not supplied).

4. Mount antenna onto pipe or tubing (not supplied) with "U" bolts (3) and hex nuts (6) provided.

5. Secure cable to mounting pipe with strap or plastic tape to avoid strain on cable connections.

6. Screw top coil (1) securely on top of whip as shown.

TOP COIL (1)

WHIP (2)

RADIAL RODS (7)

U-BOLTS (3)

MOUNTING BRACKET (4)

HEX NUTS (6)

MOUNTING NUT (5)
