

PRESIDENT MADISON 1010002 MB8719 w/11.3258

Channel Modification- Use the Update in this Volume,
pages 25-27.

Clarifier-

1. Clip R174
2. Clip D52
3. Clip the wire off of the clarifier that goes to R44.
4. Run a new wire from the Clarifier to Pin 1 of IC4.
5. Remove R175 and install a shorting jumper in it's place.
6. Remove C121, 10pf capacitor.

CT1, USB; L23, AM; L22, LSB.

Replace D35 with a Super Clarifier Diode for more slide.

Widebanding-

Remove C207. Change R206 to a 47K ohm resistor. Readjust VR4, for carrier null on SSB (if necessary). Remove TR~~24~~ 26 for more modulation.
VR10, is AM Power.
VCO is L19.

TRAM D80 MB8734 w/11.3258

1. Remove MB8734
2. Replace with a MB8719 chip.
3. Wire up switch as shown in "Master MB8719 conversion", in this volume, pages 25-27.
4. Use slider conversion as found on "MB8719 Master Slider Conversion" pages 25-27.
