

## !BANDIT GOES FIBERGLASS!

The guys at LAMTECH have done it again! The world's only true 50 ohm fiberglass stick - aptly branded the "BASTARD STICK" (maybe thats what the competitors call it!). Since it is a true 50 ohm antenna you don't have to worry about coax length, it simply doesn't matter. The length is dictated only by your needs. This is attributed to its special coil design. It is available in clear, white, black, red, or blue; and in an incredible 1' (no misprint), 2', 3', 4', or 5' length. Their 1' is the only 1' antenna that will tune all 40 channels. These are three-quarter wavelength designs.

Another UNIQUE feature is the EASY tuning method. No caps to pull off, no wire to dig out and cut. Instead, two tuning rings are used similar to their base load antenna. SWR can be adjusted in less than 60 seconds - remember time is money. The tuning rings are approximately 6 inches from the top. Like all the BANDITS, it too has the same guarantee to "OUTPERFORM ANY OTHER FIBERGLASS WHIP ON THE MARKET OR YOUR MONEY BACK". I've replaced my rusted K-40 with a 4' "BASTARD STICK" and you can't have it! But don't worry there's plenty for everyone. Get on the horn and order yours today.
