

**This Manual is provided by**  
**CBTricks.com**

Someone who wanted to help you repair your equipment  
scanned this manual.

If you would like to help us put more manuals online support us.

Supporters of CBTricks.com paid for the hosting so you would have this file.

CBTricks.com is a non-commercial personal website was created to help promote the exchange of service, modification, technically oriented information, and historical information aimed at the Citizens Band, GMRS (CB "A" Band), MURS, Amateur Radios and RF Amps.

CBTricks.com is not sponsored by or connected to any Retailer, Radio, Antenna Manufacturer or Amp Manufacturer, or affiliated with any site links shown in the links database. The use of product or company names on my web site is not endorsement of that product or company.

If your company would like to provide technical information to be featured on this site I will put up on the site as long as I can do it in a non-commercial way.

The site is supported with donation from users, friends and selling of the Galaxy Service Manual CD to cover some of the costs of having this website on the Internet instead of relying on banner ads, pop-up ads, commercial links, etc. to pay my costs. Thus I do not accept advertising banners or pop-up/pop-under advertising or other marketing/sales links or gimmicks on my website.

ALL the money from donations is used for CBTricks.com I didn't do all the work to make money (I have a day job). This work was not done for someone else to make money also, for example the ebay CD sellers.

All Trademarks, Logos, and Brand Names are the property of their respective owners.  
This information is not provided by, or affiliated in any way with any radio or antenna Manufacturers.  
Thank you for any support you can give.

**SUBJECT:** FOR MODEL COP-50HL FOLLOW THIS PROCEDURE  
FOR INSTALLING LOW BAND CRYSTALS AND  
ADJUSTING LOW BAND OSC. COIL

**TO INSTALL CRYSTALS:**

1. Remove the five screws, one on the left and right side of the unit and three on the rear panel.
2. Remove the cover by sliding it away from front panel.
3. Figure 1 shows the location of the crystal sockets.
4. Insert the crystals into the sockets, and then using the label provided, write in the respective frequencies. Affix label to top of cabinet for easy reference.

5. When using low band crystals in the range of 30 to 50 MHz, adjust slug in L-11 coil, 2 turns clockwise to assure stability of oscillation.
